Going Green on Father's Day

This year Father's Day is Sunday June 21, 2009 and has become a day to not only honor your father, but all men who act as a father figure. Stepfathers, uncles, grandfathers, and adult male friends are all honored on Father's Day. To make this Fathers Day special, why not surprise your dad with an environmentally friendly occasion. Everyone is concerned about the health of our planet, so he'll appreciate and be fascinated by your brilliant ideas for green gifts and activities. Here are some great tips for being environmentally friendly for Fathers Day

What You Can Do for His Special Day

1. Replace his normal toiletries with fresh smelling organic shaving cream or aftershave.
2. Introduce him to the rich smell and taste of organic coffees or purchase a personalized refillable travel mug that can be used every morning.
3. Purchase a compost bin and take the time to show him how to compost. Besides being impressed with your knowledge, he'll enjoy sharing a hobby with you.
4. Make a Fathers Day gift basket packed with homemade or local grown organic jellies, jams and pies, herbal teas, organic popcorn, and unfiltered honey.
5. Create a list of ten things that you learned from your dad on a homemade card, using recycled paper.
6. Wrap your Fathers Day present in recycled wrapping paper
