

Friday Facts: Plastic Containers

Did you know that our plastic recycler now accepts all types of plastic containers that are marked with a triangle and number?

This means that now you can recycle your **microwaveable meal trays** and **yogurt cups** along with the plastic bottles here at work. Containers should be wiped or rinsed clean to avoid odor and pest problems before being placed in the bottle recycling receptacles.

It takes hundreds of years for a plastic bottle to break down once it's buried in a landfill and recycling a single plastic bottle can conserve enough energy to light a 60W bulb for up to 6 hours. **So please remember to recycle all of your plastic containers!**
